### **April 26 Altercation at Comstock Park High School**

On April 26, 2010, a physical altercation occurred at Comstock Park High School between four students. This unfortunate incident stemmed from interactions between the youth the previous weekend and spilled over into school the following Monday. This incident caused a substantial disruption to the educational setting and placed the involved students and by-standers at risk for injury.

An unknown student videotaped the altercation and it was posted via the internet on YouTube. Local print and electronic media outlets picked up this incident and provided a great deal of coverage to the altercation itself and the ensuing disciplinary hearings for the involved students.

In May, our Board of Education conducted individual disciplinary hearings for each of the students involved in the April 26 altercation. Each individual student was permanently expelled from Comstock Park Public Schools.

Our district takes great pride in maintaining safe learning environments in all of our buildings that allow our students and staff to focus on learning. Incidents that disrupt that educational process and put our students and staff in harm's way are not acceptable and will not be tolerated.
